

Please note the updated West Okement RBPA boundary - October 2024

DNPA and RSPB have kindly agreed to simplify the upstream boundary of the West Okement RBNA. The changes make it easier for teams to cross the West Okement at Sandy Ford without following a permitted access through the RBNA as the Ford can be approached from the west, the south and the east. The revised RBNA follows the boundary of the ancient Forest of Dartmoor, from Steng-a-Tor ESE, passing just to the north of the Sandy Ford BS and NE-ly uphill for 650m to turn NW-ly about 100m before the BS at SX 5802 8838 to head for Fordsland Ledge,
